ENERGYLAB	
HEAD RESEARCHER	
<p>MsC of Industrial Engineering and MBA Executive. Since 2008 working in Energy Efficiency.</p>	
<p><b>ENERGY EFFICIENT THERMAL GENERATION IN PORTS FOR HEATING AND COOLING.</b></p>	
<p>Thermal energy both for process heating and cooling is one of the main energy demands in ports worldwide. We will analyze the viability for efficient thermal generation through district heating, thermal energy recovery and heat pumps.</p>
