LNG BUNKERING AND CONSUMERS. EXPERIENCE IN SPAIN AND REGULATIONS	
<p>A brief introduction regarding the use of LNG and other different solutions to increase efficiency and thus reducing the emissions will be made, explaining the advantages and comparing the different solutions on a ship.</p> <p>A presentations of Bureau Veritas projects worldwide in LNG market will be done, focusing on the Spanish vessels (New Constructions and Existing Ships), including tugs, RO-PAX, and LNG Bunkering ships. The trend for the LNG market and other Gas Fuels will also be explained.</p> <p>The regulations and specific BV notations will be introduced for both types of ships using LNG: those which are consuming LNG in their machinery and those providing the bunkering service.</p>
